

TYRE REGULATIONS

Changes for 2022 and beyond

Time Attack's successful partnership with world-leading manufacturer Pirelli as the championship's official controlled tyre supplier continues for a seventh and final season in 2022. However, Pirelli has announced that the production of the Trofeo R in all but 18" sizes is being discontinued and consequently, 2022 will be the final year of their involvement with the Time Attack Championship.

The Pirelli Trofeo R tyre is the priority controlled tyre for all of the Club Category Classes and the Club Pro Class. The second choice control tyre is Nankang AR-1 which must be used when there is not a Pirelli available in the correct size.

In wet conditions, drivers may choose an alternative Pirelli or Nankang tyre from the Motorsport UK 1A and 1B lists. Club Pro Class drivers may use Pirelli wet racing tyres. Pirelli slicks and racing wets must be used in the Pro and Pro Extreme Classes.

Competitors must use the Nankang AR-1 if Pirelli does not manufacture a tyre of a suitable size.

In certain cases and where neither manufacturer produces a tyre that fits, competitors must nominate the alternative brand and type they intend to use. Requests will be considered by the organisers who will notify the competitor of their decision. Please note, the type of tyre selected may negate the opportunity to set lap records.

Single round entry competitors may also apply for dispensation to run an alternative make of tyre for the first event only.

Please refer to championship regulation 5.9 in all cases.

Enquiries and ordering

Competitors are advised to order tyres at least five working days in advance of the event. Protyre will bring the tyres to the event and fit them at the circuit. Alternatively, tyres can be posted for a fee. Please allow at least two working days for delivery and check with Pirelli regarding lead times.

There will be a small amount of stock carried on the truck. However, pre-ordering is advised to ensure the right size and type are available.
